BRENDA MILNER

Memorable Accomplishments

Owen Egan/McGill University

Brenda Milner studied the function and structure of the human brain and helped establish how the hemispheres of the brain interact. Milner's work gave us a greater understanding of cognitive processes such as learning and memory. She has played a major role in shaping modern neuropsychology.

Ingenium is committed to encouraging and empowering women and girls in science, technology, engineering, and math. Learn more at: ingeniumcanada.org/womeninstem/
